

Apache Directory Studio 1.3.0 released

The Apache Directory Team is pleased to announce the release of Apache Directory Studio 1.3.0, a new major update of its Eclipse based LDAP Browser and Directory client.

You can download Apache Directory Studio 1.3.0 as a standalone RCP application for Mac OS X, Linux and Windows here:
<http://directory.apache.org/studio/downloads.html>

You can install it directly in Eclipse using this update site:
<http://directory.apache.org/studio/update/1.x/>

Here are a few highlights of this new version:

- The RCP application now bundles Eclipse 3.4 dependencies
- A lot improvements in the LDAP Browser
 - DSML Import/Export is now working again (with new export options)
 - Ability to save a configuration as an URL
 - Ability to create a new Context Entry
 - New "GoToDN" Dialog
 - Fixed the display of values of attributes with 'Generalized Time' syntax
 - Many more feature requests and bug fixes
- The Apache DS Configuration Editor now reads the configuration of Apache DS 1.5.4
- The Apache DS plugin now bundles Apache DS 1.5.4 dependencies and runs Apache DS instances version 1.5.3 (created with Studio 1.2.0) and version 1.5.4 (created with Studio 1.3.0).
