

Widget Demo

This page demonstrates a few widgets running on our test servers.

To see multi-user functionality you will need to open the page on to separate computers or in two browsers tabs/instances.

NOTE: Widgets in this page are embedded using a simple iFrame representation. This means we don't support multiple registered users in this demo.

NOTE: The test servers are not run on mission critical machines and therefore may occasionally be offline.

To see a complete demo, including multi-user demonstrations see our [Demonstration Server](#)

Natter

A simple chat widget.

<p>Your browser does not support iframes.</p>

ShareDraw

This widget allows multiple users to draw on a shared canvas.

<p>Your browser does not support iframes.</p>

Bubbles

A simple game widget.
