

Apache Directory Studio 1.5.3 released

The Apache Directory Team is pleased to announce the release of Apache Directory Studio 1.5.3, a bug fix and enhancement update of its Eclipse based LDAP Browser and Directory client.

You can download Apache Directory Studio 1.5.3 as a standalone RCP application for Mac OS X, Linux and Windows here: <http://directory.apache.org/studio/downloads.html>

You can install it directly in Eclipse using this update site: <http://directory.apache.org/studio/update/1.x/>

Here are a few highlights of this new version:

- fixed a critical bug that makes Studio gone into an endless event loop
- Apache DS plugin comes with the latest 1.5.6 version of Apache DS
- Apache DS Configuration plugin can now handle correctly the latest 1.5.6 version of Apache DS server.xml file
- editors now warns the user if they contain modifications and the input is changed
- various improvements in certificates handling
- added a new 'Delete All' menu item for entries, bookmarks and searches
