

# Source Repository

## GITHUB

To browse the sources via GitHub: <https://github.com/apache/cxf>

You can fork that repository, commit changes to your fork, and submit pull requests through GitHub's pull request mechanisms.

The repository is dual-hosted, so it's also valid to use <https://gitbox.apache.org/repos/asf?p=cxf.git>

## Checking out from GIT

The source code can be checked out anonymously over HTTPs by doing:

```
git clone https://github.com/apache/cxf.git
```

or

```
git clone https://gitbox.apache.org/repos/asf/cxf.git
```

## FISHEYE

In addition you can use: <https://fisheye.apache.org/browse/cxf>
