

# Installing Java EE 5 SDK

## Overview

Java EE 5 SDK provides the necessary components to create and host enterprise Java applications. It includes the Glassfish application server which can also be used as a container for the Metro implementation of the [Stonehenge StockTrader Sample Application](#).

## Installing Java EE 5 SDK (w/JDK and Glassfish)

1. In a web browser, navigate to the [Java EE 5 SDK download page](#).
2. Select your platform, and then click the **Download** button under \*GlassFish Java EE + JDK\*
3. Install the setup package following the documentation corresponding to your platform.
4. At the **Admin Configuration** screen of the installation, configure the settings using the values shown in the table below:

Property	Value
Admin User Name	admin
Password	<i>A strong memorable password</i>
Prompt for Admin User Name and Password	Selected
Admin Port	4848
HTTP Port	8080
HTTP Port	8181

5. Once installation is complete, configure the following environment variables:

Name	Sample Value
AS_HOME	C:\Sun\SDK
JAVA_HOME	C:\Sun\SDK\jdk

### Note

For more details about this procedure, please see: [How to Set Environment Variables](#).

6. Add the following paths to your PATH environment variable:

Description	Example Path
Glassfish binaries folder	C:\Sun\SDK\bin
JDK binaries folder	C:\Sun\SDK\jdk\bin

### Note

For more details about this procedure, please see: [How to Set Environment Variables](#).
