

Site-Dev-Plan

Topics include:

1. webcontent conversion.
2. idl/api translation from codebase.
3. idl reference extensions.
4. web site improvements: project and user portal

Webcontent Conversion.

Script and web project list in `ooo/trunk/tools/dev/`.

IDL/API Translation.

UNOIDL - that is, the Unified Network Object Interface Description Language compiler, which produces the content of `api.oo.o`, and the input files.

IDL Reference Extensions.

These are used in (at least) the MediaWiki.
