

# Apache Geronimo Board Report - 2012-01 - January

## Apache Geronimo Board Report

Apache Geronimo is an open source server runtime that integrates the best open source projects to create Java/OSGi server runtimes that meet the needs of enterprise developers and system administrators.

The community released our first Java EE 6 compliant server (Geronimo 3.0-beta-1). 3.0-beta-1 is both web profile and full profile compliant. There were multiple additional releases. A new committer Trygve Hardersen was voted as a new committer by the PMC.

### Releases

The community had released Geronimo 3.0-beta-1 versions of our server, samples, and eclipse plugin. Geronimo 2.1.8 was also released.

### JUGs and Conferences

Two Geronimo presentations were given at ApacheCon in Vancouver.

### Community

The PMC accepted a code donation to the project from Hypobytes LTD.

### New PMC Members

### New Committers

Trygve Hardersen was voted as a new committer on the project.

### Security

The Java HashTable collision Denial of Service vulnerability reported in late December affected Geronimo releases. The community has addressed the issue with new releases and patches.
