

tabbedPanel

To use this tag:

- Add: `<%@ taglib prefix="sx" uri="/struts-dojo-tags" %>` to your page.
- The [head](#) tag must be included on the page, which can be configured for performance or debugging purposes.
- If the `parseContent` parameter for the [head](#) tag is false (it is false by default), then the `id` tag is required.

Additional Examples

For more examples see [Ajax and JavaScript Recipes](#)

Description

Error formatting macro: snippet: java.lang.NullPointerException

Parameters

Error formatting macro: snippet: java.lang.NullPointerException

Examples

The following is an example of a `tabbedpanel` and `panel` tag utilizing local and remote content:

Error formatting macro: snippet: java.lang.NullPointerException

Use `notify` topics to prevent a tab from being selected:
