

Status Report December 2012

December Board Report (Submitted 2012-DEC-10)

Apache Sling is an OSGI-based scriptable web framework that uses a Java Content Repository, such as Apache Jackrabbit, to store and manage content.

There are no issues which require board attention at the moment.

Community

New committer: Antonio Sanso

Good activity level overall, and contributions from several new people in the last few weeks.
