

# Upgrade from 1.2.0-M1 to 1.2.0

1. [Before starting](#)
2. [Source changes](#)
  1. [POM](#)
  2. [Other](#)
3. [Internal storage changes](#)

## Before starting

Before starting the upgrade process, with 1.2.0-M1 running, perform the following actions either via REST or admin console:

1. Create a boolean configuration schema `passwordReset.allowed`
2. Create a boolean configuration schema `passwordReset.securityQuestion`
3. Create a notification with
  - a. mail template `requestPasswordReset`
  - b. event `[CUSTOM]:[]:[]:[requestPasswordReset]:[SUCCESS]`
  - c. user filter `token!=$null`
  - d. recipients: flag only Include users matching About
4. Create a notification with
  - a. mail template `confirmPasswordReset`
  - b. event `[CUSTOM]:[]:[]:[confirmPasswordReset]:[SUCCESS]`
  - c. user filter `token!=$null`
  - d. recipients: flag only Include users matching About

## Source changes

### POM

In the root `pom.xml`:

- change `parent/version` from `1.2.0-M1` to `1.2.0`
- change `properties/syncope.version` from `1.2.0-M1` to `1.2.0`

### Other

Replace the following files with their 1.2.0 counterparts (re-apply any customization previously made).

#### SYNCOPE-548

- `console/src/main/resources/console.properties`
- `console/src/main/resources/consoleContext.xml`
- `console/src/test/resources/console.properties`

#### SYNCOPE-550

- `core/src/main/resources/userWorkflow.bpmn20.xml`
- `core/src/test/resources/userWorkflow.bpmn20.xml`
- `console/src/test/resources/consoleContext.xml`

#### User workflow definition

If not starting with an empty internal storage, please consider importing the first user workflow definition above via admin console.

#### SYNCOPE-135

- `core/src/main/resources/META-INF/orm.xml`
- `core/src/main/resources/META-INF/orm.xml.oracle`
- `core/src/main/resources/META-INF/orm.xml.sqlserver`
- `core/src/main/resources/content.xml`
- `core/src/main/resources/mail.properties`
- `core/src/test/resources/content.xml`
- `core/src/test/resources/mail.properties`
- `console/src/main/resources/authorizations.xml`

# Internal storage changes

If not starting with an empty database, the following changes are needed:

## SYNCOPE-135

```
INSERT INTO Entitlement VALUES("SECURITY_QUESTION_LIST", NULL);
INSERT INTO Entitlement VALUES("SECURITY_QUESTION_READ", NULL);
INSERT INTO Entitlement VALUES("SECURITY_QUESTION_CREATE", NULL);
INSERT INTO Entitlement VALUES("SECURITY_QUESTION_UPDATE", NULL);
INSERT INTO Entitlement VALUES("SECURITY_QUESTION_DELETE", NULL);
```
