

How do I reuse the ContextTestSupport class in my unit tests

How do I reuse the ContextTestSupport class in my unit tests

You might want to look at the various [Testing](#) options, in particular [Camel Test](#) and [Spring Testing](#) to see if those are better, more powerful options. We see ContextTestSupport as an older, less powerful option.

There are a number of useful unit test cases and support classes you can reuse in your own unit test cases.

If you use maven2 then here you go:

ContextTestSupport :

```
<dependency>
  <groupId>org.apache.camel</groupId>
  <artifactId>camel-core</artifactId>
  <version>${camel-version}</version>
  <type>test-jar</type>
  <scope>test</scope>
</dependency>
```

SpringTestSupport:

```
<dependency>
  <groupId>org.apache.camel</groupId>
  <artifactId>camel-spring</artifactId>
  <version>${camel-version}</version>
  <type>test-jar</type>
  <scope>test</scope>
</dependency>
```

if you don't use maven:

<http://repo1.maven.org/maven2/org/apache/camel/camel-core/1.2.0/camel-core-1.2.0-tests.jar> <http://repo1.maven.org/maven2/org/apache/camel/camel-spring/1.2.0/camel-spring-1.2.0-tests.jar>
