GBuild

"When I close my eyes and think big, I see a large federation consisting of smaller groups of machines from individuals and companies sharing some common building/testing infrastructure, open to and co-maintained by members of the community projects, building all our code all the time and testing it on every variety of OS, VM and Database imaginable...."

– David Blevins, Oct 26, 2005: dev@geronimo.apache.org

Contributors to the Initiative

Many thanks to all the community members that support GBuild through donations!

- David Blevins – Purchased two machines to launch GBuild
- Dain Sundstrom – Purchased two machines to launch GBuild
- [Simula Labs](#) – Donates hosting for several of the machines in the GBuild Network
- [Chariot Solutions](#) – Contributed three machines plus hosting
