

Getting Source Code from Subversion

Stale Content

The content of this page is growing stale and may or may not contain relevant, useful or correct information.

Overview

Geronimo uses [Subversion](#) to manage its source code. Instructions on Subversion use can be found in the [Version Control with Subversion book](#).

Geronimo has been divided into a number of sub-repositories.

Repository Location	Web Access	Description
http://svn.apache.org/repos/asf/geronimo/branches	http://svn.apache.org/viewvc/geronimo/branches/	Geronimo Branches
http://svn.apache.org/repos/asf/geronimo/daytrader/	http://svn.apache.org/viewvc/geronimo/daytrader/	DayTrader application
http://svn.apache.org/repos/asf/geronimo/devtools	http://svn.apache.org/viewvc/geronimo/devtools/	Development Tools (e.g. the eclipse-plugin)
http://svn.apache.org/repos/asf/geronimo/gbuild	http://svn.apache.org/viewvc/geronimo/gbuild/	GBuild framework
http://svn.apache.org/repos/asf/geronimo/javamail	http://svn.apache.org/viewvc/geronimo/javamail/	??
http://svn.apache.org/repos/asf/geronimo/sandbox	http://svn.apache.org/viewvc/geronimo/sandbox/	Geronimo Website
http://svn.apache.org/repos/asf/geronimo/site	http://svn.apache.org/viewvc/geronimo/site/	Committers play area
http://svn.apache.org/repos/asf/geronimo/specs	http://svn.apache.org/viewvc/geronimo/specs/	Specification Implementations
http://svn.apache.org/repos/asf/geronimo/tags	http://svn.apache.org/viewvc/geronimo/tags/	Tagged versions of Geronimo
http://svn.apache.org/repos/asf/geronimo/trunk	http://svn.apache.org/viewvc/geronimo/trunk/	Geronimo Server Trunk
http://svn.apache.org/repos/asf/geronimo/xbean	http://svn.apache.org/viewvc/geronimo/xbean/	XBean

To be completed..
