

# Apache Directory Studio 1.5.1 released

The Apache Directory Team is pleased to announce the release of Apache Directory Studio 1.5.1, a bug fix and enhancement update of its Eclipse based LDAP Browser and Directory client.

You can download Apache Directory Studio 1.5.1 as a standalone RCP application for Mac OS X, Linux and Windows here: <http://directory.apache.org/studio/downloads.html>

You can install it directly in Eclipse using this update site: <http://directory.apache.org/studio/update/1.x/>

Here are a few highlights of this new version:

- a bug where a modify operation could be sent to the server when refreshing the LDAP Browser view
- correctly handling entries with a hash sign (#) in their DN
- glitches and performance improvements in the UI
- typos in the french translation
