Release Notes 2.0.11.1

These are the notes for the Struts 2.0.11.1 distribution.

Struts 2.0.11.1 corrected two serious security flaws in the Struts 2 <s:url> and <s:a> tags where a missing URL encoding handling for <script> HTML tag can lead to a reflected XSS (cross site scripting) exploit. All users are strongly encouraged to upgrade to Struts 2.0.11.1.

For prior notes in this release series, see Release Notes 2.0.11
