WebHCat Reference JobIDs

List JobIDs — GET queue

Description

Return a list of all job IDs.

Version: Deprecated in 0.12.0

GET queue is deprecated starting in Hive release 0.12.0. (See HIVE-4443.) Users are encouraged to use GET jobs instead.

Version: Obsolete in 0.14.0

GET queue will be removed in Hive release 0.14.0. (See HIVE-6432.) Use GET jobs instead.

URL

http://www.myserver.com/templeton/v1/queue

Parameters

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
<th>Required?</th>
<th>Default</th>
</tr>
</thead>
<tbody>
<tr>
<td>showall</td>
<td>If showall is set to &quot;true&quot;, then the request will return all jobs the user has permission to view, not only the jobs belonging to the user. This parameter is not available in releases prior to Hive 0.12.0. (See HIVE-4442.)</td>
<td>Optional in Hive 0.12.0+</td>
<td>false</td>
</tr>
</tbody>
</table>

The standard parameters are also accepted.

Results

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ids</td>
<td>A list of all job IDs either belonging to the user, or (Hive 0.12.0 and later) job IDs the user has permission to view if showall is true.</td>
</tr>
</tbody>
</table>

Example

**Curl Command**

```
& curl -s 'http://localhost:50111/templeton/v1/queue?user.name=ctdean'
```

**JSON Output**

```json
{
    "job_20111111311_0008",
    "job_20111111311_0012"
}
```
Replaced in Hive 0.12.0 by: GET jobs
