Home

Apache Lenya is a Content Management System (OverviewCMS).

Warning: Many pages in this wiki are very much outdated with respect to the current Lenya 2.0 trunk. Please take the information you find in here with a metric ton of salt. Your first reference for 2.0 matters should be the staging documentation at http://lenya.zones.apache.org/docu/docs/2_0_x/index.html (which is periodically transferred to the main Lenya site).

General

- Lenya Homepage: http://lenya.apache.org/
- Glossary - Lenya terminology
- Technologies used by Lenya (XSLT, CSS, XSL-FO etc.)

Howto

- Tutorials

Architecture

- OverviewSitemapStructure - a brief introduction into the cocoon sitemaps used by Lenya
- SitemapWalkthrough - what happens when you view a page?
- OverviewSitemapEntryPoints
- OverviewSitemapCreatePage

Lenya 1.2 information

- Series of Articles on Lenya by Jon Linczak http://redarrow.textdrive.com/
- Series of How-To's for Lenya by Paul Ercolino http://solprovider.com/lenya

Information in need of updating

- Lenya Evaluation Guide
- Practical Steps to your first Lenya publication
- OverviewAuthenticationAndAuthorization

Demo Sites

Demo Sites hosted by the Lenya project

- Based on Lenya 1.2.x with the default publications
- Based on Lenya 2.0.x with the default publications

Third-party Demo Sites

- Lenya 1.2.X with various Open Source publications (wyona.org)
- Based on Lenya 1.2.x with custom publications (University of Zurich)

Community

- Meetings
- ModulesForge: keep track of contributor's modules

Templates

- ProjectReleaseAnnouncements

Sketches, Scrap

- Redesign
  - Lenya 3.0
  - RoadmapLenya3.0 (Need to be reviewed and copy into another section, not really a roadmap IMO)
