Apache UIMA Wiki

Welcome to the Apache UIMA Wiki!

This wiki is a place for the wider community of people interested in Apache UIMA to work together collaboratively in many ways.

Here are some broad topics, with links to pages for them.

Documentation

- [Configuring UIMA Pipelines Externally for a particular run](#)
- [Documentation](#)

Eclipse

- [Extracting from SVN components into Eclipse Projects](#)
- [Eclipse Compiler Settings](#)
- [Working on Eclipse UIMA Plugins](#)
- [Building and Maintaining the Eclipse Update Site](#)
- [Differences between Running Unit Tests in Eclipse and in Maven](#)

Instructions for Committers

- [Things that need updating when changing release version number](#)
- [How To Update the Website HTML Content](#)
- [How to Update the Javadocs on the Website](#)
- [Issues when running test cases on Linux or other *nix server boxes](#)
- [Deploying Maven Artifacts to the Staging Repository](#)

Developer tips

- [Maven Tips](#)
- [Building Eclipse Plugins with maven-bundle-plugin and friends](#)
- [Running UIMA Apps on Hadoop](#)
- [Compiling and Running under Microsoft VISTA 64bit](#)

Other

- [Sandbox](#)
- [uimaFIT](#)
- [DUCC \[demo\]](#)
- [UIMA Requirements](#)
- [OASIS UIMA Specification Compliance Issues](#)

Incubation

- [Redesign for more standards including Maven](#)
- [Modernizing UIMA \(aka UIMA 3\)](#)

Development Mini Specs

- [Reducing overhead for remote service calls](#)
- [Improving UIMA Debug Capabilities](#)
- [CAS Viewer Extension For Provenance Tracking of UIMA CAS Content](#)
- [APIs for CAS Journaling](#)
- [Proposed Changes to UIMA C++ build and packaging](#)
- [CasCopier and Views](#)

Future Enablements

- [UIMA OSGi Enablement](#)
- [UIMA Integrated Toolset](#)

Working on Logos
