

# Monitoring EhCache with JMX

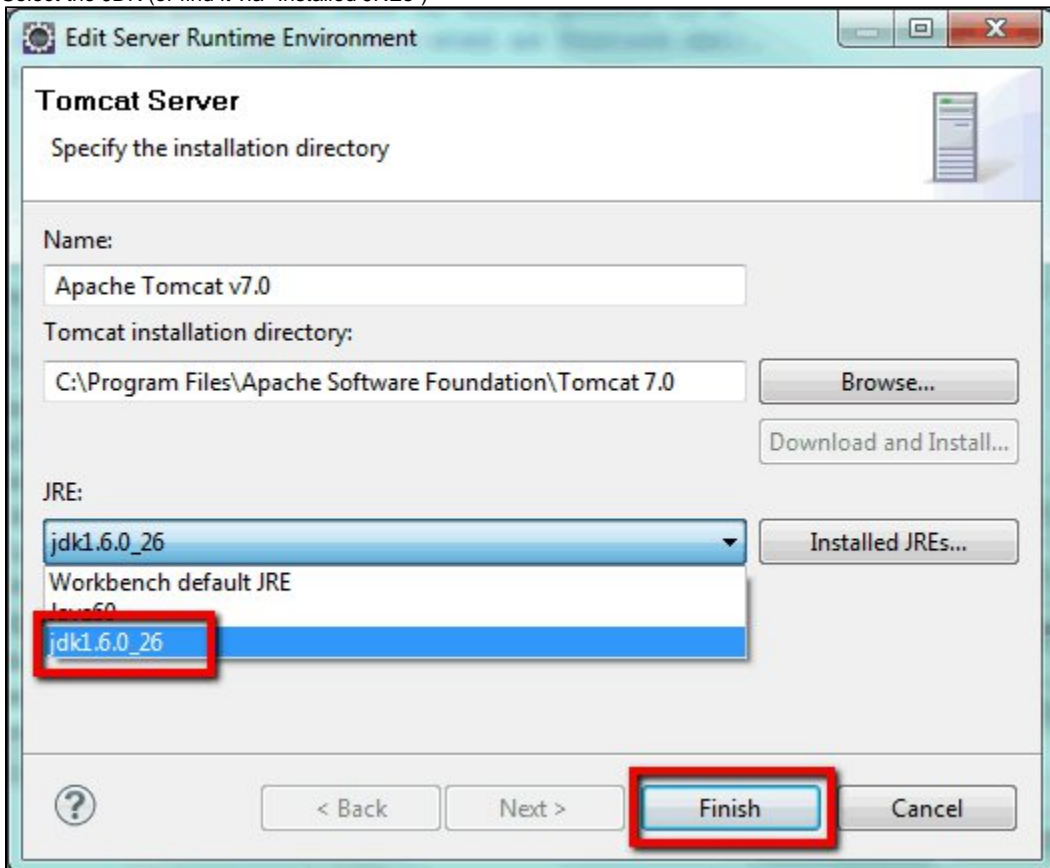

## Monitoring EhCache with JMX

EhCache has several MBeans that will tell you all about the caches that are running. See here: <http://ehcache.org/documentation/operations/jmx>

1. Make sure Tomcat is running with the JDK and not the JRE.
2. Go to Window->Preferences->Server->Runtime Environments

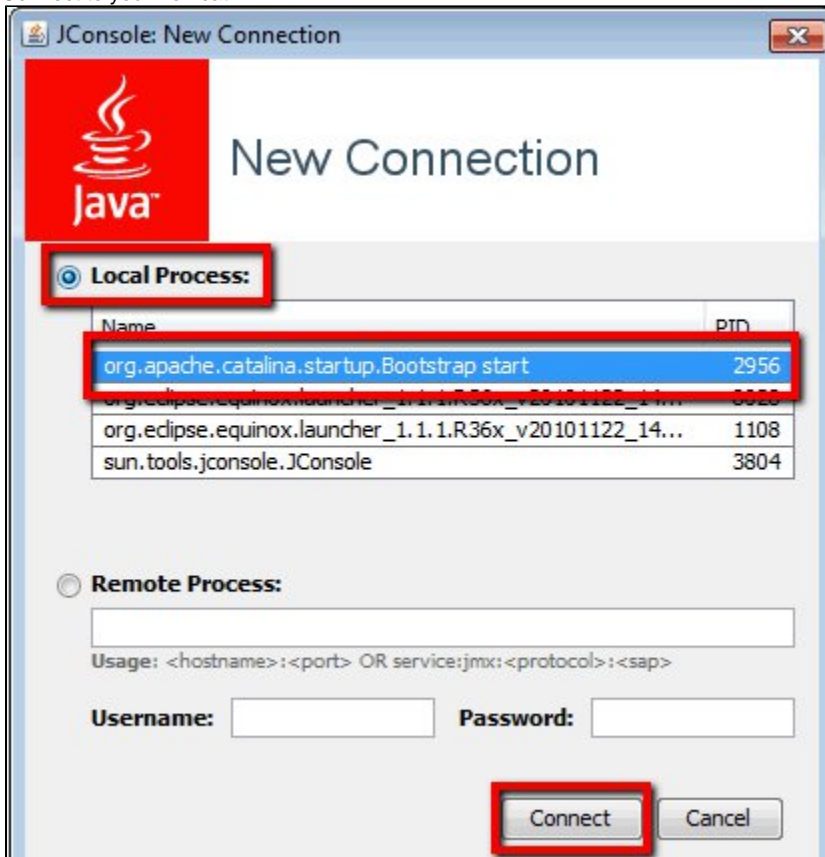

3. Select the JDK (or find it via "Installed JREs")

4. Click Finish

5. Start Tomcat in Eclipse in the normal way.
6. Go to <JDK Home>/bin
7. Launch jconsole.exe
8. Connect to your Tomcat PID

9. Go to the "MBeans" tab
10. Check out all of the cool stuff for your caches
