

Status Report - August 2012

Submitted to board@apache.org on August 8, 2012

DESCRIPTION

Apache Flume is a distributed, reliable, and available system for efficiently collecting, aggregating, and moving large amounts of log data to scalable data storage systems such as Apache Hadoop's HDFS.

RELEASES

- * Flume version 1.2.0 was released on July 26 which provides many new features and bug fixes over the previous release.
- * No further releases are planned at this time.

CURRENT ACTIVITY

- * Development activity continues as can be seen from the following report: <http://s.apache.org/eKz>
- * All post-graduation tasks have been completed. All the infrastructure has been setup as a TLP including the website using the CMS, conforming to the branding and infrastructure requirements.
- * The project has adopted Git as the primary source control system.

COMMUNITY

- * PMC Composition has not changed since the last report.
- * Committer composition changed with Mubarak Seyed joining as a committer.
- * A user-group meetup is being organized for the week of October 22 around the time of Strata-Hadoop World conference in NY.
- * Currently there are:
 - Total of 117 subscribers to the developer list
 - Total of 270 subscribers to the user list
 - Total of 21 committers
 - Total of 20 PMC members

ISSUES

- * There are no issues requiring board attention at this time.
