

Welcome Babak Vahdat as the newest Camel Rider

Today the Camel PMC voted another one of the very active and talented contributors to become a committer.

Babak Vahdat was actively involved with Apache Camel for about ten month contributing code and helping other users. In the past two months his activity reached a new level. Babak proactively improved our code base, provided patches for broken builds and tested our new releases. In recognition of his work, the PMC only had to take care of the simple task of making that official. Stay tuned for his first official commit.

On behalf of the Camel PMC, Babak, welcome aboard!

Christian
