

# File Upload Interceptor

See [this page](#) for more examples and advanced configuration

Error formatting macro: snippet: java.lang.IndexOutOfBoundsException: Index: 20, Size: 20

## Parameters

Error formatting macro: snippet: java.lang.IndexOutOfBoundsException: Index: 20, Size: 20

## Extending the Interceptor

Error formatting macro: snippet: java.lang.IndexOutOfBoundsException: Index: 20, Size: 20

## Examples

### Example action mapping:

Error formatting macro: snippet: java.lang.IndexOutOfBoundsException: Index: 20, Size: 20

Notice the interceptor configuration in the preceding example.

### Example JSP form tags:

Error formatting macro: snippet: java.lang.IndexOutOfBoundsException: Index: 20, Size: 20

Error formatting macro: snippet: java.lang.IndexOutOfBoundsException: Index: 20, Size: 20

### Example Action class:

Error formatting macro: snippet: java.lang.IndexOutOfBoundsException: Index: 20, Size: 20

### Setting parameters example:

```
<interceptor-ref name="fileUpload">
  <param name="allowedTypes">
    image/png, image/gif, image/jpeg
  </param>
</interceptor-ref>
```

This part is optional and would be done in place of the `<interceptor-ref name="fileUpload" />` line in the action mapping example above.
