{rate:title=Rating|theme=dynamic}

Overview

The EJB plugin INLINE

allows EJB3 session beans to be injected into Struts 2 actions

It's loosely based on strut2ejb3 plugin <http://code.google.com/p/struts2ejb3/> , added caching optimizations so it behaves a bit more efficient during runtime.

Works with JBoss 4.2.2 out of the box.

Requirements

- Struts 2.0.6+

Installation

Copy distribution jar to `/WEB-INF/lib` directory.

Usage

Please read this short info here: <http://code.google.com/p/struts2ejb3-jboss-plugin>
