

# Release Themes - Ranger 0.6

Continuing on the momentum we have as a community

Release Theme	Description	Benefit to users	Apache JIRA#	Documentation /Wiki Link
Tag Based Policies	Apache Atlas would provide a way to classify data, Ranger would need to provide an ability to policies based on tag/classification	Providing a tag based classification makes it simpler for users to manage security policies globally	 <a href="#">RANGER-274</a> - Add support for TAG based policies <span>RESOLVED</span>	<a href="#">Tag based policy requirements</a>
Column Prohibition	As part of a governance policy, users may specify policy to disallow a query if 2 or more specific columns are included in the query	This feature will prevent any accidental breach of security or compliance rules from regular users		<a href="#">Column Prohibition - Initial thoughts</a>
