

Dependencies

This page lists the dependencies for specific releases, which can be used to compare the dependency sets between versions.

The lists were generated with the command below. Some manual cleanup may be required.

```
mvn dependency:list | grep ".*:.*:.*" | grep -v -e "Finished at" -e "Some problems" | cut -d] -f2- | sed 's/[a-z]*$/g' | sort -u
# 'mvn dependency:list' outputs the list of all dependencies (including transitive ones)
# 'grep ".*:.*:.*"' looks for dependency-like lines
# 'grep -v -e "Finished at" -e "Some problems"' excludes certain lines that are just noise
# 'cut -d] -f2-' removes [INFO] blocks from the output
# 'sed 's/[a-z]*$/g'' removes the dependency scope
# 'sort -u' sorts the output and removes duplicate entries
```
