

# Google Base Integration

## Merchant Configuration

To configure the merchant integration between OFBiz and Google Base you have to change the following file in specialpurpose/googlebase/config/googleBaseExport.properties

```
## Merchant
googleBaseExport.developerKey - obtain from http://code.google.com/apis/base/signup.html
googleBaseExport.authenticationUrl - https://www.google.com/accounts/ClientLogin
googleBaseExport.accountEmail - google account email
googleBaseExport.accountPassword - google account password
googleBaseExport.postItemsUrl - http://www.google.com/base/feeds/items/batch
```
