

Stonehenge WSAS StockTrader Documentation

Platform Information

WSO2 Web Services Application Server (WSAS) is a web services engine running on top of [Apache Axis2](#). WSAS provides a runtime for deploying and managing Java-based web services.

Implementation Status

The WSAS implementation of the [Stonehenge StockTrader Sample Application](#) is available [in the trunk](#). It currently contains an implementation of the [StockTrader Business Service](#), the [StockTrader Order Processor Service](#), the [StockTrader Configuration Service](#), the [StockTrader Active Security Token Service \(STS\)](#), and the [StockTrader Passive Security Token Service \(STS\)](#).

Known Issues

 At the time of the M2 release there is a known issue with the WSAS Business Service communicating with .NET and Metro Order Processors using WS Security. The current error is "PKIX path building failed: sun.security.provider.certpath.SunCertPathBuilderException: unable to find valid certification path to requested target".
