

If I use ServiceMix when should I use Camel

If I use ServiceMix when should I use Camel?

Camel is a routing and mediation engine which works great inside [JBI](#).

So if you are already using [ServiceMix](#) then you can use Camel implement the [Enterprise Integration Patterns](#) inside [JBI](#) such as [Content Based Router](#), routing messages between your existing JBI endpoints.

You can also reuse any of the Camel [Components](#) within JBI or expose Camel endpoints as JBI endpoints.
