Apache NetBeans

NetBeans is in the process of being released as a project governed by the Apache Software Foundation.

Read all about it here, join in, and participate:

https://netbeans.org/community/apache-incubator.html

What are the reasons for this and what does this mean?

Read all about it here, join in, and participate:

https://wiki.apache.org/incubator/NetBeansProposal

What needs to happen before NetBeans is released as a top level Apache project?

Read all about it here, join in, and participate:

https://cwiki.apache.org/confluence/display/NETBEANS/List+of+Modules+to+Review
