

Status Report March 2013

March Board Report (Submitted 2013-03-10)

Apache Sling is an OSGI-based scriptable web framework that uses a Java Content Repository, such as Apache Jackrabbit, to store and manage content.

There are no issues which require board attention at the moment.

Community

Good activity level overall, contributions from different people continue.

No new committers or PMC members, last committer election (asanso) was October 2012.
