

# Spark Internals

**NOTE:** This Wiki is obsolete as of November 2016 and is retained for reference only.

This section contains documentation on Spark's internals:

- [Java API Internals](#)
- [PySpark Internals](#)
- [Shuffle Internals](#)
- [Spark SQL Internals](#)
- [Web UI Internals](#)

Spark's [Cluster Mode Overview](#) documentation has good descriptions of the various components involved in task scheduling and execution.

The *Intro to Spark Internals* Meetup talk ([Video](#), [PPT slides](#)) is also a good introduction to the internals (the talk is from December 2012, so a few details might have changed since then, but the basics should be the same).
