

Status of documentation progress

Proposed structure for documentation

In the new navigation everything is arranged in a hierarchical structure under "Documentation". My proposed new structure looks like this:

Documentation (Overview -> was Documenting Sling **[UPDATE]**)

- Getting started (with roadmap box/hot links)
 - What is Sling **[NEW, extracts from existing home]**
 - Discover Sling in 15 minutes **[OK]**
 - Sling and JCR **[NEW]**
- Engine, the heart of Sling
 - Architecture
 - Dispatching Requests **[OK]**
 - Filters **[OK]**
 - Servlets **[OK]**
 - Resources **[OK]**
 - Adapters **[OK]**
 - Request Parameters **[OK]**
 - Default Mapping and Rendering **[REWRITE]**
 - Eventing and Jobs **[CHECK]** --> Carsten can you have a look at it
 - Authentication **[UPDATE]**
- Development
 - Getting and building Sling **[UPDATE]**
 - Zero-tools development (WebDAV, script based) **[NEW]**
 - Maven Tips & Tricks **[UPDATE]**
 - Setup with Eclipse 3.4 **[NEW, from Wiki]**
 - Maven Sling Plugin **[UPDATED, review by Felix]**
 - Maven JspC Plugin **[CHECK]**
 - How to create a new bundles and services for Sling **[NEW]**
 - Logging **[OK] [UPDATE]**
 - RequestProgressTracker **[NEW, from SLING-3]**
 - Dependency Management **[OK]**
 - Repository Based Development **[OK]** (lack of Eclipse Plugin)
- Bundles
 - MIME Type Support (commons/mime) **[OK]**
 - Internationalization Support (extensions/i18n) **[UPDATE]**
 - Manipulating Content/SlingPostServlet (servlets/post) **[OK]**
 - Content Loading (lack of JSON/XML) (jcr/contentloader) **[OK]**
 - Sling-Taglib (scripting/jsp) **[NEW - especially sling:include needs good documentation]**
... a doc page for each bundle should be the future ambition
- Tutorials & How-Tos
 - Launch Sling (was Provisioning and Startup) **[REWRITE]**
 - Installing and Upgrading Bundles **[OK]** --> link to [1]
 - ACL/ACE **[NEW]**
 - Default Sling JCR layout and nodetypes **[NEW]**
 - Implementing a ResourceProvider **[NEW]**
 - Apache Sling Rewriter **[OK]** (Code under whiteboard)
 - XSLT Processing Pipeline **[OK]**
- Wiki
- configuration (was Configuration Support) **[OK]**
- Sling in production
 - Sling standalone **[NEW]**
 - Sling in a Servlet container **[NEW]**
 - Sling with Apache httpd **[NEW]**
 - Access Logging **[NEW]**
- Sling API (JavaDoc) **[OK]**
- FAQ (Wiki)
