

HTTP Transport

CXF includes two HTTP options for building services. There is a Servlet transport for those who are deploying into a Servlet container. There is also a standalone HTTP server based on Jetty. The follow sections explain these in more detail as well as how to configure the client side HTTP transport.

- [Asynchronous Client HTTP Transport](#)
- [Client HTTP Transport \(including SSL support\)](#)
- [Jetty Configuration](#)
- [Server HTTP Transport](#)
- [Servlet Transport](#)
- [Standalone HTTP Transport](#)
