

Features

Apache ActiveMQ Features

Apache ActiveMQ is packed with features; to get an idea you might want to look at the [Features Overview](#) otherwise here is the list of all of the main features...

- [Active Groups](#)
- [ActiveMQ Real Time](#)
 - [Broadcasting](#)
 - [Group Membership](#)
 - [Life Cycle](#)
 - [The ActiveBlaze Message type](#)
- [Broker Camel Component](#)
- [Clustering](#)
 - [MasterSlave](#)
 - [JDBC Master Slave](#)
 - [KahaDB Replication \(Experimental\)](#)
 - [Pure Master Slave](#)
 - [Shared File System Master Slave](#)
 - [Networks of Brokers](#)
 - [Replicated Message Store](#)
- [Command Agent](#)
- [Consumer Features](#)
 - [Consumer Dispatch Async](#)
 - [Consumer Priority](#)
 - [Exclusive Consumer](#)
 - [Manage Durable Subscribers](#)
 - [Message Groups](#)
 - [Redelivery Policy](#)
 - [Retroactive Consumer](#)
 - [Selectors](#)
 - [Slow Consumer Handling](#)
 - [Subscription Recovery Policy](#)
- [Destination Features](#)
 - [Composite Destinations](#)
 - [Configure Startup Destinations](#)
 - [Delete Inactive Destinations](#)
 - [Destination Options](#)
 - [Mirrored Queues](#)
 - [Per Destination Policies](#)
 - [Virtual Destinations](#)
 - [Wildcards](#)
- [Discovery](#)
- [Enterprise Integration Patterns](#)
- [Features Overview](#)
- [Horizontal Scaling](#)
 - [Scaling Queues](#)
- [Interceptors](#)
 - [Destinations Plugin](#)
 - [Logging Interceptor](#)
 - [StatisticsPlugin](#)
 - [TimeStampPlugin](#)
- [JMSXUserID](#)
- [JMX](#)
 - [JMX Support](#)
- [Logging a warning if you forget to start a Connection](#)
- [MDC Logging](#)
- [Message Dispatching Features](#)
 - [Async Sends](#)
 - [Dispatch Policies](#)
 - [Message Cursors](#)
 - [Optimized Acknowledgement](#)
 - [Producer Flow Control](#)
 - [Total Ordering](#)
- [Message Features](#)
 - [ActiveMQ Message Properties](#)
 - [Advisory Message](#)
 - [Blob Messages](#)
 - [Delay and Schedule Message Delivery](#)
 - [JMS Streams](#)
 - [Message Transformation](#)
 - [ObjectMessage](#)
 - [Structured Message Properties and MapMessages](#)
- [New Features](#)
 - [Changes in 4.0](#)
 - [New Features in 4.1](#)

- New Features in 5.0
- New Features in 5.1
- New Features in 5.2
- New Features in 5.3
- New Features in 5.4
- New Features in 5.5
- New Features in 5.6
- New Features in 5.7
- New Features in 5.8
- New Features in 5.9
 - Runtime Configuration
- New Features in 5.11
- New Features in 5.13
- New Features in 6.0
- Performance
 - ActiveMQ Performance Module Users Manual
 - sample report
 - Load Testing with Camel
 - Performance report
- Persistence
 - AMQ Message Store
 - Configurable IOException Handling
 - JDBC Support
 - SQLServer
 - Sybase
 - KahaDB
 - Kaha Persistence
 - LevelDB Store
 - Periodically checking disk limits
 - Pluggable storage lockers
 - Replicated LevelDB Store
- Scaling the Depth of a Queue
- Security
 - Audit Logging
 - Cached LDAP Authorization Module
 - Encrypted passwords
 - Shiro
- The Proxy Connector
- Unix
 - Unix Service
 - Unix Shell Script
- URI Protocols
 - VM Protocol
- Visualisation
 - Visualisation Wish List
