Welcome to Apache WINK

This project has been retired. For details see <https://incubator.apache.org>.

Apache Wink is an Apache Incubator project. The [Apache Wink proposal](#) contains the basic information pertaining the project. In short:

Apache Wink is a project that enables development and consumption of REST style web services. The core server runtime is based on the JAX-RS (JSR 311) standard. The project also introduces a client runtime which can leverage certain components of the server-side runtime. Apache Wink will deliver component technology that can be easily integrated into a variety of environments.

Project Website

The project website is currently at: <http://incubator.apache.org/wink/>

Documentation

- [Apache Wink Developer Guide](#)
(Work in progress)
- [Apache Wink 1.0 Developer Guide](#) ([HTML](#) / [PDF](#))
- [API](#) (Javadoc)
- [JAX-RS Information](#)

Downloads

Use the links below to download binary or source distributions of Apache Wink

What	Version	Tar	Zip
Binary	1.1	apache-wink-1.1-incubating.tar.gz	apache-wink-1.1-incubating.zip
Source	1.1	apache-wink-1.1-incubating-src.tar.gz	apache-wink-1.1-incubating-src.zip

Wink Binary Distribution Archive contains Wink server module, client module, extensions, all third party dependencies, server and client examples, documentation.

Communication

Mailing Lists

List	Usage	Subscribe	Unsubscribe	Archives
User (wink-user@incubator.apache.org)	Discussion amongst users of Wink including feedback and project happenings.	wink-user subscribe	wink-user unsubscribe	Apache mod box
Development (wink-dev@incubator.apache.org)	Discussion about defects, new feature work and project happenings.	wink-dev subscribe	wink-dev unsubscribe	Apache mod box

Commits (wink-commits@incubator.apache.org)	Notifications of commits to the repository.	wink-commits subscribe	wink-commits unsubscribe	Apache mod box
---	---	--	--	--------------------------------

IRC

As with many Apache projects, we have an IRC channel on Freenode: click [apache-wink](#) or connect to [Freenode](#) with your favorite IRC client and /join apache-wink.

It's possible to use a [Web Client](#).

Project Guidelines

The [Project Guidelines](#) define the roles in the project, communication methods, how decisions are made, and other important information.
