

BeyondGrade.net

Thanks to the simple and yet powerful and flexible Click Framework, I was able to put together this web site in a very short time. This is a web site about and for k-12 schools. Check it out.

<http://www.beyondgrade.net>

I have used many features of Click.

- . Templating to have a consistent layout, I can even easily change the wet site theme.
- . Tables
- . TabbedPannel
- . Bar Chart

Other noticable features:

- . Google Map API
- . Google AdSense
- . Google Charts & cahrts4j (for Pie Charts)
- . RSS feeds

Special thanks to Bob for his timely expert help answering my questions posted to the forum.

This site is still in its infantry (a lot more features to be added). I will share more information as I move along.
