

AOO 3.4 RC Build Test Report

Hi QA volunteer, please respond to this page to give your testing report, follow below format:

| Platform | Installation way (Clean or Upgrade) | Test Scenarios | Test Results |
|-------------------|---|---|--|
| Windows7 32bit | Parallel installation to 3.3 + RC1 (r1327774) installation after remove of OOo 3.3, but keep user profile | OOo 3.3 extensions recognized, report builder 1.2.1 remains, Base manual tests, creating new .odb file, registered, closing file, reopening, opening existing .odb file, creating new table in design mode and with wizard, creating form with wizard and in design mode, creating report, opening external server connected .odb file connecting to server with user name and password, ODBC, JDBC, native connections to MySQL 5.5, Firebird 2.5, PostgreSQL 9.1, running existing reports, error with report builder generated reports with charts | Update OK, No new errors in Base excluding report builder |
| Windows7 Starter | Update a AOO r1309668 | Installation not possible, because the "version is already installed". The version r1327774 has the same revision number 9590 as the older r1309668. After removing r1309668 manually installation of r1327774 works without further problems. | Update not possible. |
| Windows7 64bit | clean and upgrade Installer | en_base version ,spell check , install language packs(zh) and switch ui language , install or remove or disabled or enabled extenstions | update OK ,no new errors |
| Ubuntu10.04 32bit | Clean install, RC1(r1325589), language pack r1310206 | Install en-us/zh-cn/fr full build: 1) Install language packs (de,zh-cn,es,ja, pt-BR), switch UI, create/open/save files. 2) Install dictionaries (de, fr, es). 3) Check the dictionary setting in character formatting and Spell check dialog, and it works, save file and reopen. 4) Disable /remove extensions, check the UI and functional impact. 5) Uninstall all component of OO. | 1) zh-cn, zh-tw language packages can not work after switch UI language. 2) The pt-BR language package will partially work. Some UI string can be changed into Portuguese, others will be in English, even if the full build is not en-US. Comments and screenshot added to 119210. pt-BR full build does not have this problem. |
| Redhat 6.1 32bit | Clean install and upgrade, RC1(r1325589), language package r1310206 | Clean install zh_CN full package, install Russian dic, run spellcheck, disable/remove Russian dic, run spellcheck. Upgrade from 3.3 en_US to 3.4 zh_CN. Install fr language package on zh_CN full installation set, switch UI. | installation OK. Load,save,reopen OK. UI Check, OK. dictionary and spellcheck: OK. Upgrade: 119158: cannot upgrade integrated menu from 3.3 to 3.4 on Redhat6.1 /Suse11. 119162: two copies of ooobasis packages after upgrade from oo3.3 to 3.4 on Suse 11 SP1 and soffice will crash after open a file. Language package: pass |
| Suse 11 SP1 32bit | Clean install and upgrade, RC1(r1325589), language package r1310206 | Clean install en_US package. install zh_CN language package, Switch UI. install fr language package, switch UI. Upgrade from 3.3 en_US package to 3.4 zh_CN package.Upgrade from 3.3 en_US package to 3.4 en_US package. | installation OK. Load,save,reopen OK. dictionary and spellcheck: OK. Language package:119210: cannot switch UI languages to zh_CN on Linux if installed en_US then zh_CN language package. Upgrade: 119258: languages remain in the language list though the dictionaries cannot be used after upgrade from oo3.3 |
| Windows XP SP3 | Clean install AOO 3.4 r1325589 English/French /Russian full package. | Create/open/save/reopen/spell check/screen show, all work fine. | Two regression issues found against Impress: 119238 nor P3 All graphicsneedsconfirm@graphi... CONF — The title and author font is too small if creating one presentation from template except for original ones 119239 nor P3 All graphicsneedsconfirm@graphi... CONF — Blue background in notes view |
| Windows XP SP3 | Clean install AOO 3.4 r1325589 English full package | Install Japanese, Simplified Chinese and Dutch language packages. Switch UI, check the display. Work fine. Then remove these language package and add by extension managers. | Pass testing |
| Windows XP SP3 | Upgrade from OOo 3.3 English package to AOO 3.4 English package | <ul style="list-style-type: none"> Create/open/save/reopen/spell check/screen show, all work fine. Install Japanese, Simplified Chinese and Dutch language packages. Switch UI, check the display. Work fine. Then remove these language package and add by extension managers. Work fine. | Pass testing |
| Windows XP SP3 | Upgrade from OOo 3.3 English package to AOO 3.4 Simplified Chinese full package. | <ul style="list-style-type: none"> Create/open/save/reopen/spell check/screen show, all work fine. Install Japanese, Simplified Chinese and Dutch language packages. Switch UI, check the display. Work fine. Then remove these language package and add by extension managers. Work fine. Check the extension after upgrade, no English dictionary there. It is correct behavior. And the UI is changed to Simplified Chinese. | Pass testing |
| Windows XP SP3 | Upgrade from OOo 3.2 English package to AOO 3.4 English package | <p>Check the extension, no English dictionary there and the spell check for English doesn't work.</p> <ul style="list-style-type: none"> 119271 blo P3 All ooo-issues@incubator.apache... CONF — Spell checker doesn't work if upgrade from OOo 3.2 to AOO 3.4 <p>Create/open/save/reopen/spell check/screen show, all work fine.</p> <p>Install Japanese, Simplified Chinese and Dutch language packages. Switch UI, check the display. Work fine. Then remove these language package and add by extension managers. Work fine.</p> | issue i119271 should be checked. But may not release blocker |
| Windows XP SP3 | Clean install, uninstall and reinstall | Clean install AOO 3.4 English package. Install other language packages. Then uninstall AOO 3.4. Now the language packages are still there. Then try to install OOo 3.3. After install, I tried to new document/presentation/spreadsheet, freeze and no response. I tried the scenarios three times. All failed. Then I tried to upgrade to AOO 3.4 again, always be told that the I should exit AOO 3.4 quick start first. It seems the below scenario doesn't work: OOo 3.3 plus AOO 3.4 language packages. | This should be taken as known issue |
