## Gora Administration

The best place for information on Gora Admin is the [Current Documentation](#)

**ALSO SEE THE GORA EXECUTIVE SUMMARY** - A one page document describing all you need to know about Gora.

## Tutorials and Examples

[Official Gora LogManager Tutorial](#) - An introduction to the Gora API and basic functionality.

[GoraExamples](#) - A collection of simple Gora example which feature data structures for persisting and querying Aliens, The Simpsons and typical User entities. Currently the examples use [CassandraStore](#).

[ImpoExpo](#) - Advanced data modeling for heterogeneous NBA data such as free unstructured text, semi-structured text and structured JSON. This includes advanced ETL logic and data store mapping using [SolrStore](#).

## How to edit this Wiki

This Wiki is a collaborative site, anyone can contribute and share:

- Create an account by clicking the "Login" link at the top of any page, and picking a username and password.
- Send an email dev at gora dot apache dot org
- We will grant you write access.
- Edit any page by pressing Edit at the top or the bottom of the page

There are some conventions used on the Gora wiki:

- **:TODO:** is used to denote sections that definitely need to be cleaned up.

Some general info on using this Wiki Software:

- For all Confluence related syntax and helpers, please see the **Help Tips** which is right aligned >>>
