

Getting Browser Information

To capture extended browser information... In your WebPage:

```
...  
  
getApplication().getRequestCycleSettings().setGatherExtendedBrowserInfo(true);  
  
WebClientInfo w = (WebClientInfo)getWebRequestCycle().getClientInfo();  
ClientProperties cp = w.getProperties();  
  
// do something with the data  
cp.getNavigatorAppName();  
cp.getNavigatorAppCodeName();  
cp.getNavigatorAppVersion();  
cp.getBrowserVersionMajor();  
cp.getBrowserVersionMinor();  
...
```
