

Apache Ranger 0.6.2 - Release Notes

Release in progress..

Bug

- [\[RANGER-1100\]](#) - Hive authorizer does not block update when row-filter/column-mask is specified on the table for the user
- [\[RANGER-1107\]](#) - Performance trace to measure policy download performance in plugins
- [\[RANGER-1126\]](#) - Authorization checks for non existent file/directory should not be recursive in Ranger Hive authorizer
- [\[RANGER-1129\]](#) - Ability to specify 'audit all accesses' via Ranger admin configuration
- [\[RANGER-1145\]](#) - Policy engine optimization: convert wildcard matches into prefix and suffix match
- [\[RANGER-1146\]](#) - Policy engine optimization: dynamic reordering of policy evaluation order
- [\[RANGER-1155\]](#) - Good coding practices in Ranger : Potential performance/correctness issues uncovered by static code analysis
- [\[RANGER-1156\]](#) - Audit migration script from DB to Solr cloud failing
- [\[RANGER-1160\]](#) - Ranger installation is failing for MSSQL db flavor
- [\[RANGER-1161\]](#) - Policy engine optimization: use prefix filter to reduce number of policies evaluated
- [\[RANGER-1162\]](#) - Tag lookup optimization: use prefix lookup to reduce number of evaluators attempted
- [\[RANGER-1166\]](#) - Auto complete wait time needs to be increased on Ranger UI
- [\[RANGER-1167\]](#) - Ranger admin UI loading issues in Internet Explorer
- [\[RANGER-1169\]](#) - The global audit settings specified by Ranger configuration parameter values should always be honored by the plug-ins.
- [\[RANGER-1170\]](#) - Improvement of Unit Test coverage in Ranger
- [\[RANGER-1171\]](#) - Invert authorization logic in RangerKafkaAuthorizer
- [\[RANGER-1173\]](#) - Improve Ranger database schema import logic and make it more robust
- [\[RANGER-1175\]](#) - Create policy fails for updated servicedef

Task

- [\[RANGER-1158\]](#) - Update version from 0.6.1 to 0.6.2-SNAPSHOT for branch-0.6
- [\[RANGER-1193\]](#) - Release Ranger 0.6.2
