

Thanks

ActiveMQ is a successful project because of the large and diverse community that contributes to it.

There are a handful of tools that developers in the community use; some are open-source and some are commercial. We'd like to extend a special thanks to these communities/companies:

	All of the Platinum/Gold/Silver/Bronze sponsors of the ASF
	YourKit supports ActiveMQ project with its full-featured Java Profiler. YourKit, LLC is the creator of innovative and intelligent tools for profiling Java and .NET applications. Take a look at YourKit's leading software products
