New Apache Airflow release 1.10.2 is out!

Source & Binary "Sdist" release : <https://dist.apache.org/repos/dist/release/airflow/1.10.2/>

Pypi : <https://pypi.python.org/pypi/apache-airflow> (Run `pip install apache-airflow`)

Release Notes : <https://airflow.apache.org/changelog.html#airflow-1-10-2-2019-01-19>

By default one of Airflow's dependencies installs a GPL dependency (unidecode). To avoid this dependency set SLUGIFY_USES_TEXT_UNIDECODER=yes in your environment when you install or upgrade Airflow. To force installing the GPL version set AIRFLOW_GPL_UNIDECODER. One of these two environment variables must be specified.

Want to keep abreast of new Apache Airflow updates (e.g. releases, meet-ups, new features, conference talks, etc...), follow our newly-minted Twitter account : [@ApacheAirflow](#)

April 27, 2016

We are starting the migration to Apache Infrastructure (e.g. Github Issues --> Jira, Airbnb/Airflow Github to Apache/Airflow Github, Airbnb/Airflow Github Wiki to Apache Airflow Confluence Wiki)

- The progress and migration status will be tracked on [Migrating to Apache](#)
 - We expect this to take roughly 1 week. On and after May 4, we expect to be using Apache infrastructure exclusively. To prepare for that day, start using the new Apache infrastructure and follow instructions on [AIRFLOW-11 - Migrate mailing list to Apache](#) to set up your accounts.
-

April 22, 2016

[@r39132](#) (Sid) will be speaking on July 23 at [Data Day Seattle](#)

- If there is enough interest, I'd be happy to also speak at a meetup
-

April 12, 2016

A 1.7.1. lightweight tag was mistakenly pushed to master - we don't yet have a viable 1.7.1 release candidate. On April 12, [@r39132](#) deleted the tag on master

March 1, 2016

Airbnb will be hosting the very first Airflow meetup at Airbnb HQ (888 Brannan, in SF) on March 28th.

We're planning on doing this regularly, and want to put a good line up of food, drinks and talks for you all.

It should be pretty informal, but here's a draft of the schedule for the night:

meet, geet and eat

updates on the project, roadmap & upcoming Airbnb sprints

present advanced/complex Airbnb Airflow use cases (A/B testing framework, anomaly detection or something of that nature)

Sid Anand will share about how they use Airflow at Agari

Q/A for the core project team

Community open mic, step up and make announcements if you're recruiting, looking for help, planning on working on a feature, ...

Define list of subjects of interest on a whiteboard for breaking into subject specific subgroups for discussion

Please RSVP here: <https://www.airbnb.com/meetups/daywndmbd-airflow>

We're planning on starting to have Airflow meetups regularly, so stay tuned!
