

# Home

⚠ Warn: This wiki is currently being cleaned up and contains a lot of old out-dated pages ⚠

This is a Wiki space for the Lucene Java library (<https://lucene.apache.org/core/>)

See [PoweredBy](#) for a list of software powered by Lucene.

See [Support](#) for a list of companies available for hire.

See [FrontPage](#) for content from the old Moin Wiki

[ReleaseTodo](#)

## HELP WANTED

We want to clean up the old Wiki content, in all 230 sub pages below the [Old Moin wiki](#) page.

If you are a PMC member you can edit directly. If you are not a PMC member but want to help, please email [dev@](mailto:dev@) mailing list and we'll give you edit karma.

What you can do

- Delete unnecessary pages such as "personal" profile pages that were used in MoinMoin. If you are unsure, move it as child of [Pages to delete](#) first
- Promote up-to-date high-quality pages to sub pages of this page and link to them
- Find other important but out-of-date pages, make them up to date and promote them to sub pages of this page
- Identify content that should be moved to a new asciidoc guide inside the Git source tree, and move those underneath the [Asciidoc guide candidates](#) page
