**Broken links graveyard**

This section is for the 2017 gardening project where we try to prune and lift the quality of this list. Please move entries that you believe may be not relevant anymore to this section, as a last resting place before final removal.

- WebCity uses Solr for faceted browsing of restaurants, hotels, events...

**Notes**
It would be good to add some scale information here, where possible: how many documents do these sites index, how many search requests per day, what kind of servers, etc. If someone could determine what kind of license, copyright, etc the current Solr logo has, it could be included as a text file in the zipped SVG file and could make for a clearer permission statement.

Powered by logos (in multiple formats) are available in http://lucene.apache.org/images/
