Continuous Integration

We have some Jenkins jobs (hosted at Apache Jenkins farm) that are useful to monitor the build status of the current trunk. Usually they are built one time per day, but they can be triggered even by hand (by someone with enough rights).

For Pivot 2.0.x (maintenance branch), you can find them here:

- Pivot 2.0.x build with Java 6 (Oracle JDK)
- Pivot 2.0.x build with Java 7 (Oracle JDK)
- Pivot 2.0.x build with Java 8 (JDK)

For Pivot 2.1.x (trunk), you can find here:

- Pivot trunk build with Java 8 (Oracle JDK)
