

Setting SVN Properties in TortoiseSVN Client

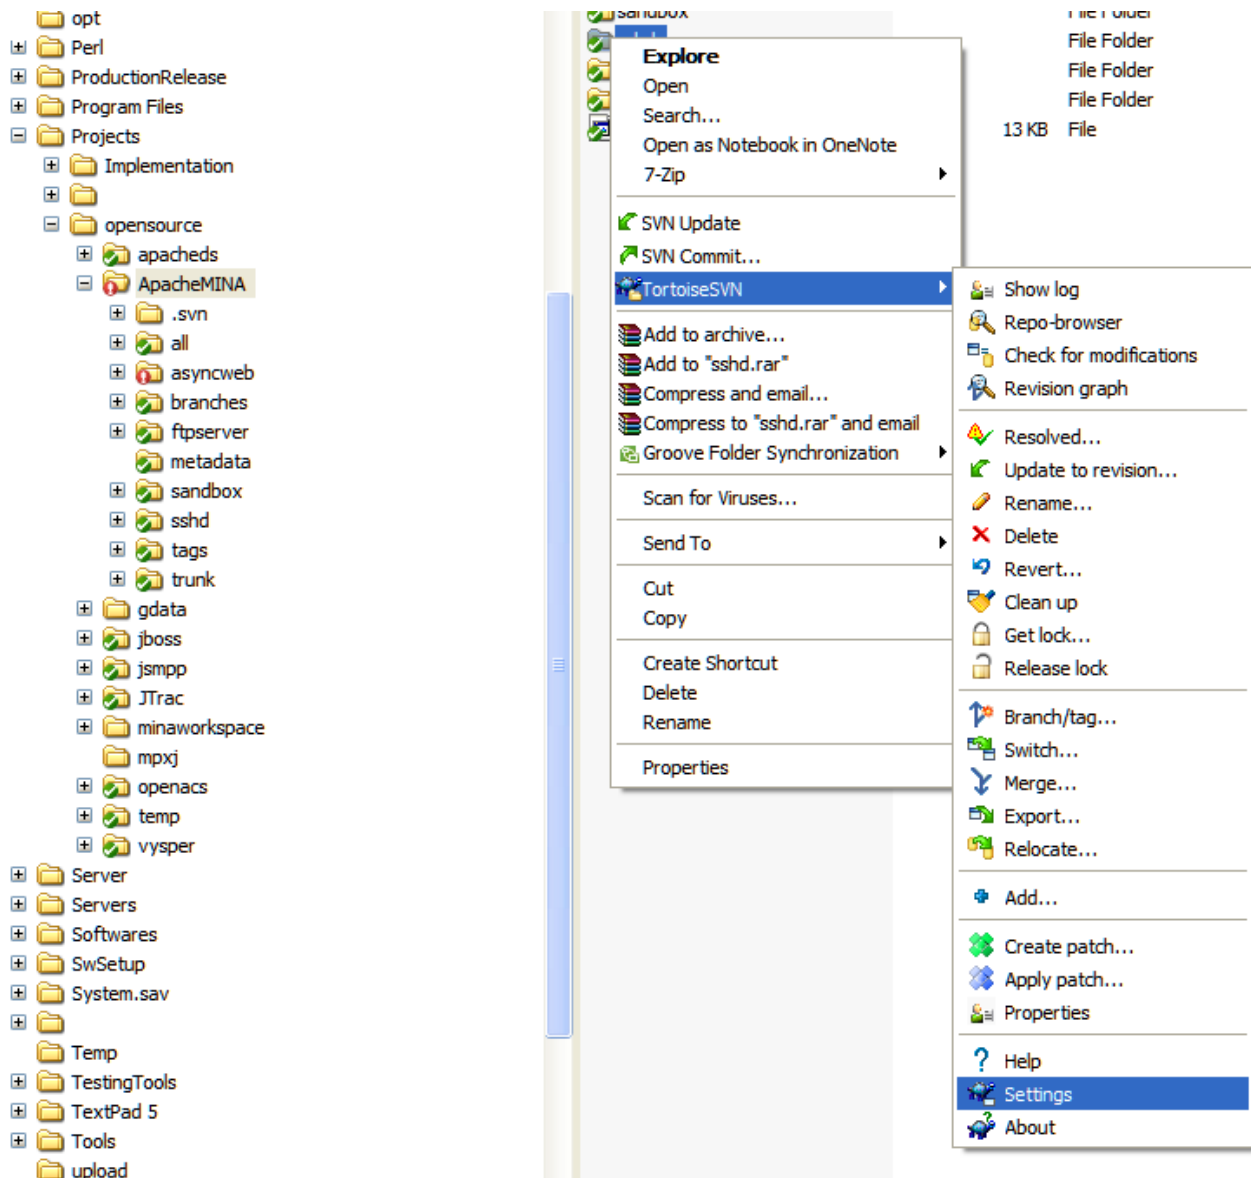

This article is for configuring SVN properties for TortoiseSVN Client

To maintain header's with revision tags like, we need to set SVN properties.

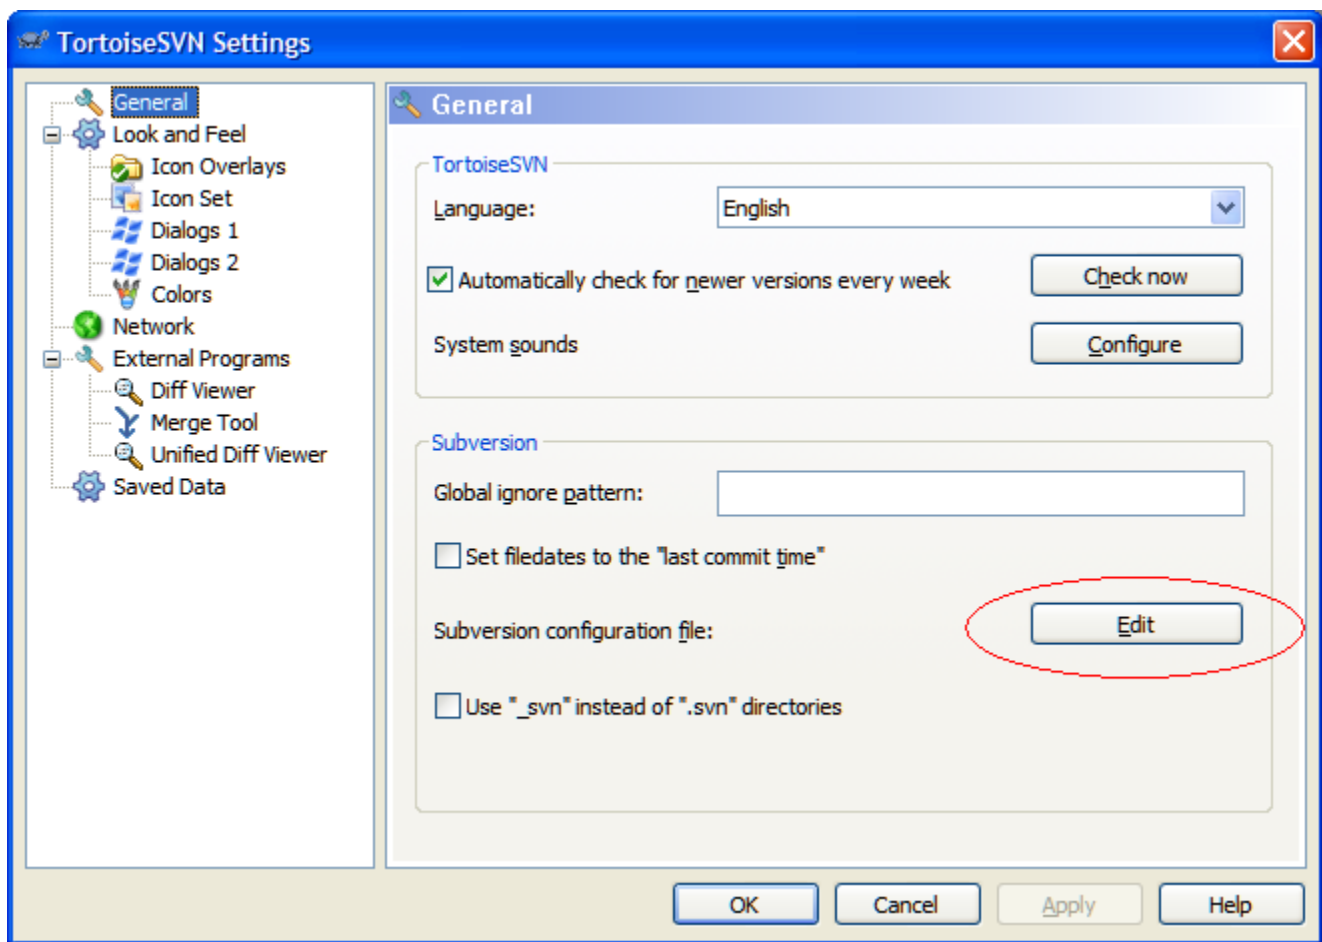

```
/**
 * @version $Rev: 529576 $, $Date: 2007-04-17 14:25:07 +0200 (mar., 17 avr. 2007) $
 */
```

Lets see how to set these properties in Tortoise SVN Client

Open Tortoise SVN Client setting, (Right Click-> Tortoise SVN -> Settings)

Click Edit button (as shown in figure)

The svn properties config file shall open up.

Search for **enable-auto-props = yes** and uncomment, if not already done. The attribute is under **miscellany**

Configure the properties **auto-props** section

Please note that I have taken these properties from <http://wiki.apache.org/incubator-yoko/SetUpAutoProps>. Feel free to update as per your needs.

```
*.java = svn:eol-style=native;svn:keywords=Rev Date
*.xml = svn:mime-type=text/xml;svn:eol-style=native;svn:keywords=Rev Date
*.xsl = svn:mime-type=text/xml;svn:eol-style=native;svn:keywords=Rev Date
