Launcher

Launcher Overview

{{ http://jakarta.apache.org/commons/launcher/images/launcher-logo-white.png }}	Commons-Launcher is designed to be a cross platform Java application launcher. It eliminates the need for a batch or shell script to launch a Java class. A lot of information is available on the Launcher website. If you don't find the information you need you can always contact us using one of the mailing lists.

External Resources

Do you have a good example, add it here!

The launcher example was originally written and contributed by Alban Peignier. You can find the original version and other usefull information on his wiki page http://wiki.tryphon.org/JavaWiki/CommonsLauncher.

FAQ

What is the earliest JRE that Launcher is compatible with?
