

# droids-tika

## Introduction

This plugin provides the functionality to use the Tika parsing facilities. Apache Tika is a toolkit for detecting and extracting metadata and structured text content from various documents using existing parser libraries.

## Dependencies

```
<dependencies>
  <dependency>
    <groupId>junit</groupId>
    <artifactId>junit</artifactId>
    <scope>test</scope>
  </dependency>
  <dependency>
    <groupId>org.apache.droids</groupId>
    <artifactId>droids-core</artifactId>
    <version>${pom.version}</version>
  </dependency>
  <dependency>
    <groupId>org.apache.tika</groupId>
    <artifactId>tika</artifactId>
    <version>0.2-SNAPSHOT</version>
  </dependency>
</dependencies>
```
