

DocDetails

Docs, Samples and Tutorials for Alpha and [ApacheCon](#)

Goals/Non-goals

- Goals
 - The Petstore app will be at the quality level where people can use it and give feedback using jira as the main communication mechanism.
 - We should be able to drop the petstore app into a Tomcat instance and have it run w/o any extra work (i.e., jdbc jndi setup)
 - Control samples should do 2 things
 - ship a database control sample
 - give early adopters, especially ISVs, a leg up on building controls
 - be functional enough that we can begin to solicit feedback from the community
- Non-goals
 - Ship supported, locked-down canonical controls

General Notes on the requirements & owners

😊 *implies task is completed*

Task	Priority	Contributors
jPetstore sample application and associated docs	1	Eddie, Kyle, Steve, Michael, Jonathan, Ken
...Pageflows/controls	1	😊
...graphics redistributable	1	😊
...schema and xbeans	1	Eddie
...plugin implementation of control interface to db control sample (<i>NOTE: not ultimate binding model for V1</i>)	1	Kyle
...HTML docs	1	Steve, Eddie
...WS/Axis integration expose as WS	1	Michael, Steve
at least one sample control and associated docs	2	Ken, Steve, <i>Hoi</i>
...DB control	2	Ken, <i>Hoi</i>
...Docs for sample control, link into jPetstore docs if useful	2	Steve
Reformat controls doc into Forrest DTD format	2	Steve
Docs in SVN for project site	2	Steve
Beehive 101 App Life Cycle	2	Steve, Ken, Kyle, Daryl, Eddie, Rich, Michael
...How do I go from downloading to building to running samples?	2	
Better pageflow documentation	2	Steve
helloWorld control tutorial	3	Steve, Kyle
Integration with other containers	3	Kyle
...This is what it takes to make Beehive work on Tomcat	3	Kyle
...What do I need to understand to integrate Beehive into my platform?	3	Kyle
