

JeroenReijn

Hi! I'm Jeroen Reijn and welcome to my little spot on this Wiki.

Since 2003 I'm a software developer working at [Hippo](#) in the beautiful city of Amsterdam. On a daily basis I'm developing websites with Apache Cocoon and in most cases in combination with our beautiful product: [Hippo CMS](#).

I've attended the CocoonGT 2003,2004,2005 and 2006.

You can also visit my [weblog](#) for some random thoughts on software development, open source and Hippo CMS.
